

10th November 2008

Gary Monaghan & Team

I am writing this letter just to thank Gary & all the team at GAE for another successful purchase & installation.

Due to the expansion of our finishing department, we have just installed the following equipment, 1 x New Horizon AFC-566AKT folder, 2 x New Vacuum Towers for our Horizon SPF 20 Collator / Stitcher which already has 2 Towers, now gives us capacity to Collate 40 leaves at once & 1 x New BQ270 Perfect Binder, to add to our current Horizon Machinery.

The above installations make us more flexible to meet customer deadlines & give us more scope to do more work in house.

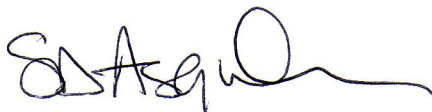

All our finishing equipment has been supplied by GAE, we made this choice again, due to the service and help that we have received from the company.

We set up our own in house finishing department 2 years ago, to run alongside our Print department that operates 24 hours.

GAE also supplied extra training to train up some new staff that we have employed since buying the new machinery.

Thanks to all at GAE who were involved in the purchase & installation of our new machinery.

Best Regards

Sean Asquith
(Production Manager)
