Gary,

Just a note to say that we are very pleased with our twin tower Horizon VAC collator/book production system.

As you know a great part of our business is high quality, full colour booklets and brochures, mostly on coated stocks with laminated covers printed on our multi colour Ryobi presses.

We came to the last Northprint exhibition to look at various finishing machines on offer, we needed a system that was quick and easy to set up and that would give our clients the precise, accurate finish that they demand. Yours was not the cheapest but we could see the build quality and features would meet our criteria, after now running the machine for nearly 18 months we can say that we did make the right choice.

The Horizon has proved to be a good investment for us.

I would certainly recommend the Horizon, the service and support that we receive from G-A-E is very good.

Yours sincerely

Paul Chapman
Production Director
